# ABOUT US

---

V.Co DESIGN specialises in providing innovative coatings solutions to superyachts, using only the best premium, self-adhesive films that are environmentally friendly, and both time efficient and cost effective to apply.

We cover all your decorative and technical surface needs, from exterior protection and colour changes to interior transformations, as well as biocide-free, durable antifouling systems and glass finishes.

With globally available, expert in-house fitters, our team understands the importance of providing flawless service, offering clear quotes and honest advice to work in harmony with your current paint system.

When it comes to your superyacht, choose a style, not just a finish.

ARLON

# WHAT V.CO DESIGN CAN DO FOR YOU

## HULL & SUPERSTRUCTURE

Finishing for a range of exterior surfaces, including hull, superstructure and deck heads. Colour transformation at a fraction of the cost and time of repainting, whether for a special event or longer term. Protection against UV and chemical damage to uphold the quality of the yacht's finish.

## TENDERS & TOYS

Match the tenders and toys to the yacht's colour to provide perfect aesthetic harmony. Quickly and economically change the colour of tenders or toys for a special event or for longer periods.

## INTERIORS

Innovative luxury textured panel finishes to provide a unique range of premium, interchangeable surface options that avoid the need to tear down interior. Lightweight, easily maintained laminates and veneers in keeping with a superyacht's style at a fraction of the weight. Durable surface materials for use in crew areas, from countertops to bulkheads.

## ANTIFOULING & PERFORMANCE SKINS

**Flow Silikon** and **Silikon Top**, a 100% biocide-free, transparent antifouling system that does not lose efficacy over time, with the option of a three or five year lifespan.

**Flow XtremSkin**, a pro-speed, lightweight biocide-free film to improve the performance of racing yachts.

## GLASS FINISH

Glare reduction for improved visibility of the surroundings. UV and heat rejection options to reduce demand on AC system and protect interior materials from sun damage.

Privacy options, including glass transformation from transparent to frosted with one-touch controls.

## CLEAR PROTECTION

Protect your surfaces in areas of more intense use with this scratch-resistant, self-healing coating that is easily cleaned and maintained.

## Why choose yacht wrapping?

Vinyl coatings have both a protective and aesthetic role to play on a superyacht's surfaces. They offer a durable, economical and quick solution to your yacht finishing needs, with a wide range of colours and textures to offer you new freedoms in creativity.

## How often will I need to replace the vinyl coating?

The coating durability will vary depending on the type of vinyl selected and how well it is maintained. Vinyl coatings have stood up very well in tests against traditional coating options for yachts.

## How long does yacht wrapping take?

This depends on how big the project is and the type of vinyl selected. The best way to gauge the time advantages is to consider that a vinyl wrap is a much shorter process than a full paint job. After surface preparation, the vinyl is heat-sealed onto the surface to which it is being adhered, and that is all that is needed.

## What will happen when I remove the vinyl?

Once the vinyl film has been removed, the paint beneath will be revealed in the same condition in which it was originally covered.

## What are the options for use of vinyl coatings in yacht interiors?

There is a wide range of uses for vinyl coatings on a yacht's interior, from deck heads and crew areas, to luxurious guest cabins with leather-effect or multi-textured relief effect surfaces.

## What if I damage the vinyl?

Depending on the amount of damage your yacht sustains, you can use the repair set that you receive when wrapping your yacht. A simple patch can do most repairs. For larger damaged areas, it is best to contact skilled fitters.

# CONTACT US

---

As our philosophy is to offer you convenience and the best service in our field, we are able to travel globally to reach your yacht.
